New operation model to enhance effective operational management in the post pandemic era, Boubou Hallberg, CEO

Process-orientation in practice in a real-life hospital setting, Karin Looström Muth, development manager

Kraftens hus (The house of power), Leine Persson, vice chairman

Stream 1

How can RPA and AI improve healthcare?

SÄS are using seven different robots, including one using AI-technique for improved efficiency and quality. You will see the robots working live, interact with one of them and also listen och talk to personnel using them in practice.

Brief admission at the psychiatric clinic

Experiences and description of brief admission at psychiatric clinic for adults. Since the start in 2017, the effect has been less need of beds for inpatients and att the same time increased the empowerment for the patients.

Mobile emergency team

Acute close care in the home based on the individual's needs and conditions.

Digital monitoring using IBD Home

Examples of digital monitoring in IBD. An ability for increased empowerment and quality.

Stream 2

The Green Cross – Patient safety in practice

Daily dialog about healthcare injuries and/or healthcare near miss with the personnel.

Life supporting HMV (home mechanical ventilation) - a method for caring including advanced medical aids at home

Tour around the clinical training center (KTC)

The goal of the KTC is to strengthen the professional competence of our employees, this leads to increased security and thus contributes to increased patient safety. Our training is based on clinical everyday life and includes everything from training of basic skills to full-scale simulation.

Remote monitoring of pacemaker patients

The cardiac intensive care unit create value by monitoring hundreds of pacemaker patients remotely every day. The patients can be safe at home knowing the hospital is monitoring their hearts. See how the unit work with the technology and hear how they interact with the patients in their homes while the patients are carrying on with their daily lives.
