

X6 | CUHK Medical Centre - Leadership Workshop and Tour

CUHK Medical Centre (CUHKMC) is a not-for-profit private teaching hospital wholly owned by The Chinese University of Hong Kong. The hospital is established to serve the social mission of bridging the gaps between public and private healthcare services, through the offering of transparent and affordable package prices.

Planned with a capacity of 516 beds, the hospital officially opened in September 2021. The hospital is designed with salutogenic features to promote patient healing, age friendliness, enriched patient experience and person-centredness. It is also the first purpose built smart hospital in Hong Kong with 5G connectivity, Internet of Things (IoT) infrastructure, and automated systems to facilitate people communication and operational efficiency. Extensive use of IoT solutions has enabled the hospital to track people, asset, and materials to form close-loop systems to improve quality, safety, and efficiency in the provision of patient care services.
