

Building capacity & leadership in healthcare

Bob Klaber & Carina Crawford-Khan

Quality Improvement Hub

Things we want to share:

1. Our challenges
2. Our approach to QI
3. Our experiment
4. Our learning
5. What next?

Our care

over
**one
million**

outpatient
contacts

196,000

inpatient
contacts

280,000

A&E
attendees

9,200

babies
born

Our staff

10,500

staff, including

2,300

doctors

4,300

nurses &
midwives

600

allied health
professionals

1,000

scientists &
technicians

120

pharmacists

Things we want to share:

1. Our challenges
2. **Our approach to QI**
3. Our experiment
4. Our learning
5. What next?

Our organisational approach to improvement at Imperial College Healthcare NHS Trust

Encourage & Enable

Make quality improvement accessible to all staff

Develop an improvement culture within our teams

Connect staff ideas with organisational strategic priorities

Involve patients & citizens at the heart of improvement work

Build Skills & Capability

Use the IHI's Model for Improvement to guide small tests of change

Build staff & patient skills in co-design based on experiences

Learn how to measure for improvement & widen access to analytics

Share ideas, stories, insights & learning

Organisational Commitment

Base our improvement culture on our values & behaviours

Embed consistent & rigorous improvement methods into all work

Leaders and managers coaching & leading for improvement

Focus unrelentingly on being a learning organisation

Four Primary Drivers:

Aim of the QI Programme:

To create an organisational culture of continuous improvement

Engage with staff and patients to ensure everyone knows about QI and feels empowered and energised to see improving care as a key part of their role.

Build improvement capability through a programme of QI education to enable staff to lead, champion & coach QI activities and initiatives within their teams.

Support teams to deliver focused **QI projects and programmes** which are co-designed with patients, service-users and the public.

Embed consistent and rigorous improvement methods when addressing all practical problems and strategic opportunities within the organisation

Imperial College Healthcare
NHS Trust

Our framework to support patient, public & citizen engagement & involvement

Maximising individual health and wellbeing

Greater involvement in own health and care through self-management, 'expert' patient education, patient information, peer support, shared decision making, involvement clinical research

Supporting service delivery and improvement

Fundraising & Volunteering activities supporting delivery of care including peer support, hospitality activities, collecting feedback

Improving services

Involvement in improvement through Experience Based Co-Design, 'QI Sprints', improvement project groups, focus groups, feedback, measuring experiences and outcomes and what matters most, health service research and evaluation

Informing strategy, policy, planning & decision making

Involvement in planning and developing strategy or policy, decisions affecting how services operate through oversight groups, patient 'reps', 'lay 'reps', communicating changes

Things we want to share:

1. Our challenges
2. Our approach to QI
3. **Our experiment**
4. Our learning
5. What next?

Our experiment:

Things we want to share:

1. Our challenges
2. Our approach to QI
3. Our experiment
- 4. Our learning**
5. What next?

Our learning:

Things we want to share:

1. Our challenges
2. Our approach to QI
3. Our experiment
4. Our learning
5. **What next?**

What next?

1. How can our Trust play an active role in the neighbourhood?
2. How can these relationships lead to effective strategy and vision for healthcare in our region?
3. Might this lead to NHS Trusts working in a more prevention focused way and tackling the social determinants of health?
4. How does one find the cover to do this sort of work, when the financial pressures are so great?
