

Experience Day 1: Innovation in healthcare (National Taiwan University Hospital)

Overview

The National Taiwan University Hospital was founded in 1895. It is a national, public, university based teaching hospital and tertiary medical centre located in Northern Taiwan. The main hospital contains 2400 beds and 6500 staff members, and in addition to the main site there are five additional branch hospitals.

During the experience day you will learn:

- How we train students with top hardware and software devices.
- How we use AI and Information System to help patients in health care.
- How we promote patient safety through quality improvement.
