

Learning agents meta learning work- Summary for Forum team

- Pierre Barker is leading with support from Goran Henriks a new stream of work at the forum The purpose is to better synthesise things people learn while they are here so it could be very useful for future planning.
- It's labelled as part of the science symposium but is in fact fairly separate
- The process is essentially that the Learning Agents fill in a form after sessions they have been to, to record what they feel they have learned. The Learning agents meet twice during the Fourm to discuss and then have a feedback session. It's an experimental process that could be expanded and changed. Maureen or Goran may well refer to this work in their closing keynote, but nothing further.

The learning agents (all very senior delegates)

- Pierre Barker
- Amar Shah
- Don Goldman
- Dominique Allwood
- Goran Henriks
- Johan Thor
- Julie Reed
- Maureen Bisognano
- Nana Twum Danso
- Selina Stephen
- Suzi Hannah
- PLUS Goran's team of 20 Swedish improvement fellows

They've all been involved in several emails from Pierre and should know about it, and have access to this form to record learnings - Pierre collating with IHI help
