

E8: Fostering Workforce Joy and Well-being While Combating Burnout: Lessons from IHI & ELFT

Jessica Perlo, MPH; Senior Director, IHI
Amar Shah, Chief Quality Officer, East London NHS Foundation Trust

@jperlo8 @DrAmarShah

Session Objectives

After attending this session, attendees will be able to:

- Recognize the value of prioritizing workforce well-being in your quality agenda
- Identify the key changes in the system for joy and staff well-being
- Take away at least one intervention you can test in your institution

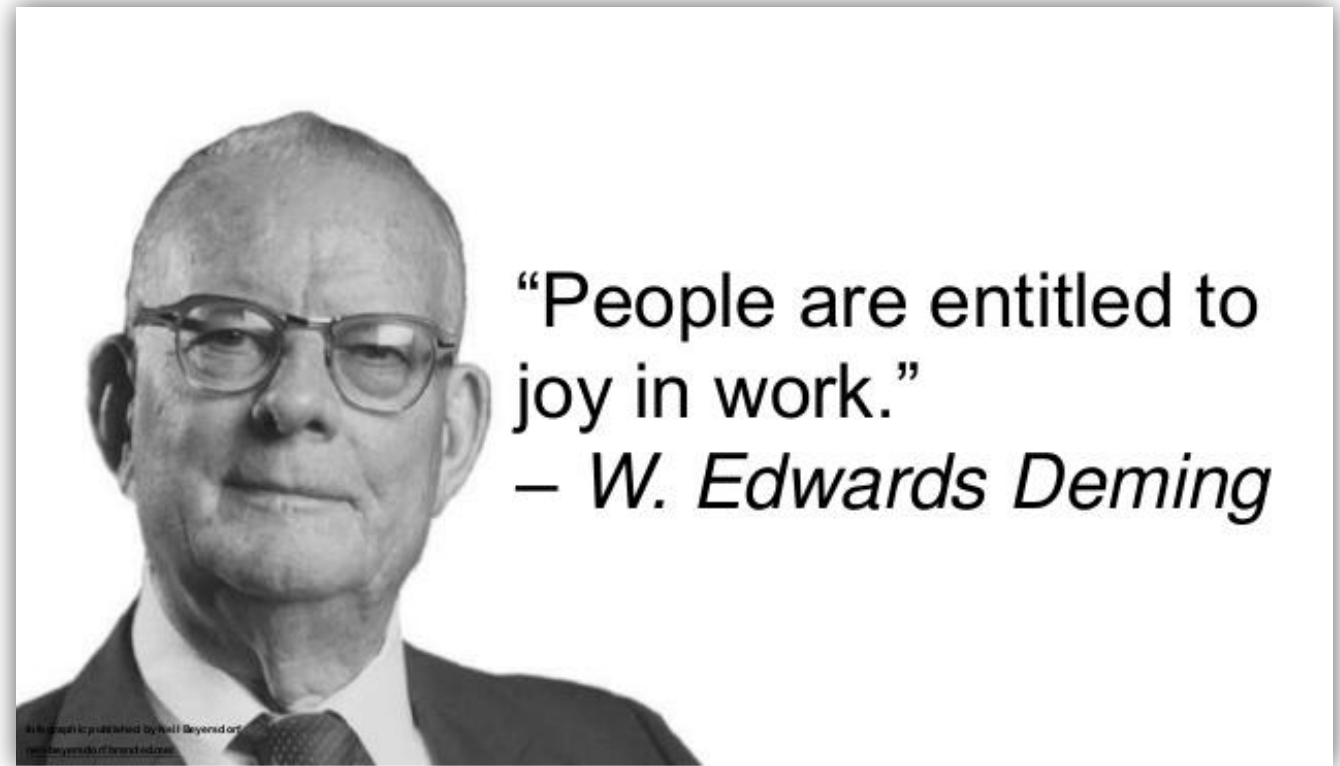

What is one thing that is bringing you joy this week?

The negative screams at you but the positive only whispers...

Barbara Fredrickson

Op-Ed: Hand a burned-out healthcare worker a baked good, and 'muffin rage' may follow

"Muffin rage" is what the French peasants might have felt if Marie Antoinette had leaned out the window and cheerfully shouted at them to just eat cake. (Genevieve Ko / Los Angeles Times)

BY JILLIAN HORTON

DEC. 12, 2021 3:10 AM PT

Differentiating Well-being & Burnout

Burnout	A syndrome of emotional exhaustion, depersonalization, and reduced personal accomplishment occurring from chronic workplace stress .
Depression	A prolonged episode of at least 2 weeks characterized by depressive mood or anhedonia occurring most of the day, nearly every day. Context dependent .
Moral Distress	A psychological response to morally challenging situations. This can be a result of a situation in which a health care professional is prohibited from taking the morally correct course of action or in a situation where there is moral uncertainty regarding decisions surrounding patient care
Professional Well-being	A function of being satisfied with one's job, having a high quality working life, and finding professional fulfillment in one's work, as a result of constructive conditions in the workplace
Resilience	Ability of a person , community or system to withstand, adapt, recover, rebound, or even grow from adversity, stress or trauma

The Burning Platform

7

Coping during COVID-19 Pandemic

- Components of covid stress – fear of exposure, anxiety/depression and work overload
- Feeling valued associated with less stress/burnout
- Higher stress in nurses, women, persons of color, inpatient clinicians, critical care, and nursing assistants.

Brain Biological Effects of Burnout

Well-being for an Equitable Workplace

Health equity in the workplace means that all employees have a fair and just opportunity to be as healthy as possible. – Robert Wood Johnson Foundation

In this large national study of US resident physicians, reported **symptoms of burnout** were associated with **greater explicit and implicit biases towards people of color**

[Paving the Road to Health Equity - OMHHE - CDC](#)

Top Ten Patient Safety Concerns 2022

1. **Staffing shortages**
2. **COVID 19 effects on healthcare workers' mental health**
3. **Bias and racism in addressing patient safety**
4. **Vaccine coverage gaps and errors**
5. **Cognitive bias and diagnostic error**
6. **Nonventilator pneumonia**
7. **Human factors in operationalizing telehealth**
8. **International supply chain disruptions**
9. **Products subject to emergency use authorization**
10. **Telemetry monitoring**

The Financial Burden: the ROI on JOY

Cost to health system for just one discipline in just one country:

- Physician burnout in United States: \$2.6 – 6.3 billion

Cost to individual organization

- Physician burnout: \$7,600 — \$12,500 per employed physician each year.
- Replacing a physician can cost an organization between \$500,000 and \$1 million
- Replacing a Registered Nurse costs an organization on average \$37,700 to \$58,400 per RN.

Office of the US Surgeon General -
We must shift
burnout from a
“me” problem to a
“we problem.”

Q: Is workforce well-being an explicit priority to your organization or team?

Joy and Well-being Cannot Happen When:

Work demands and pressures not matched to knowledge skills and abilities

Little control over work processes and demand/workload

Moral injury is repeatedly happening

Unsafe and inequitable work environment

IHI Framework for Well-being & Joy in Work

Outcome:
↑ Patient experience
↑ Organizational performance
↓ Staff burnout

4. Use improvement science to test approaches to improving joy in your organization

3. Commit to making *Joy in Work* a shared responsibility at all levels

2. Identify unique impediments to *Joy in Work* in the local context

1. Ask staff “what matters to you?”

IHI Framework for Well-being & Joy in Work

Outcome:
↑ Patient experience
↑ Organizational performance
↓ Staff burnout

4. Use improvement science to test approaches to improving joy in your organization

3. Commit to making *Joy in Work* a shared responsibility at all levels

2. Identify unique impediments to *Joy in Work* in the local context

1. Ask staff “what matters to you?”

Start Here

What is a “What Matters To You” conversation?

- The purpose is to **build relationships** and engage in effective, meaningful conversations:
 - What matters to each individual?
 - How to build on assets:
 - What helps make a good day?
 - When we are at our best, what does that look like?
 - What gets in the way of a good day?
- **Listen to understand** what matters, to enable teams to work together using improvement science tools to address the things that get in the way of what matters
 - Pebbles in the shoes – smaller issues that the local team can work on
 - Boulders – bigger issues that need to be referred to senior leader for resolution

What Matters to You? Start with Bright Spots

This is a “What’s working now?” question

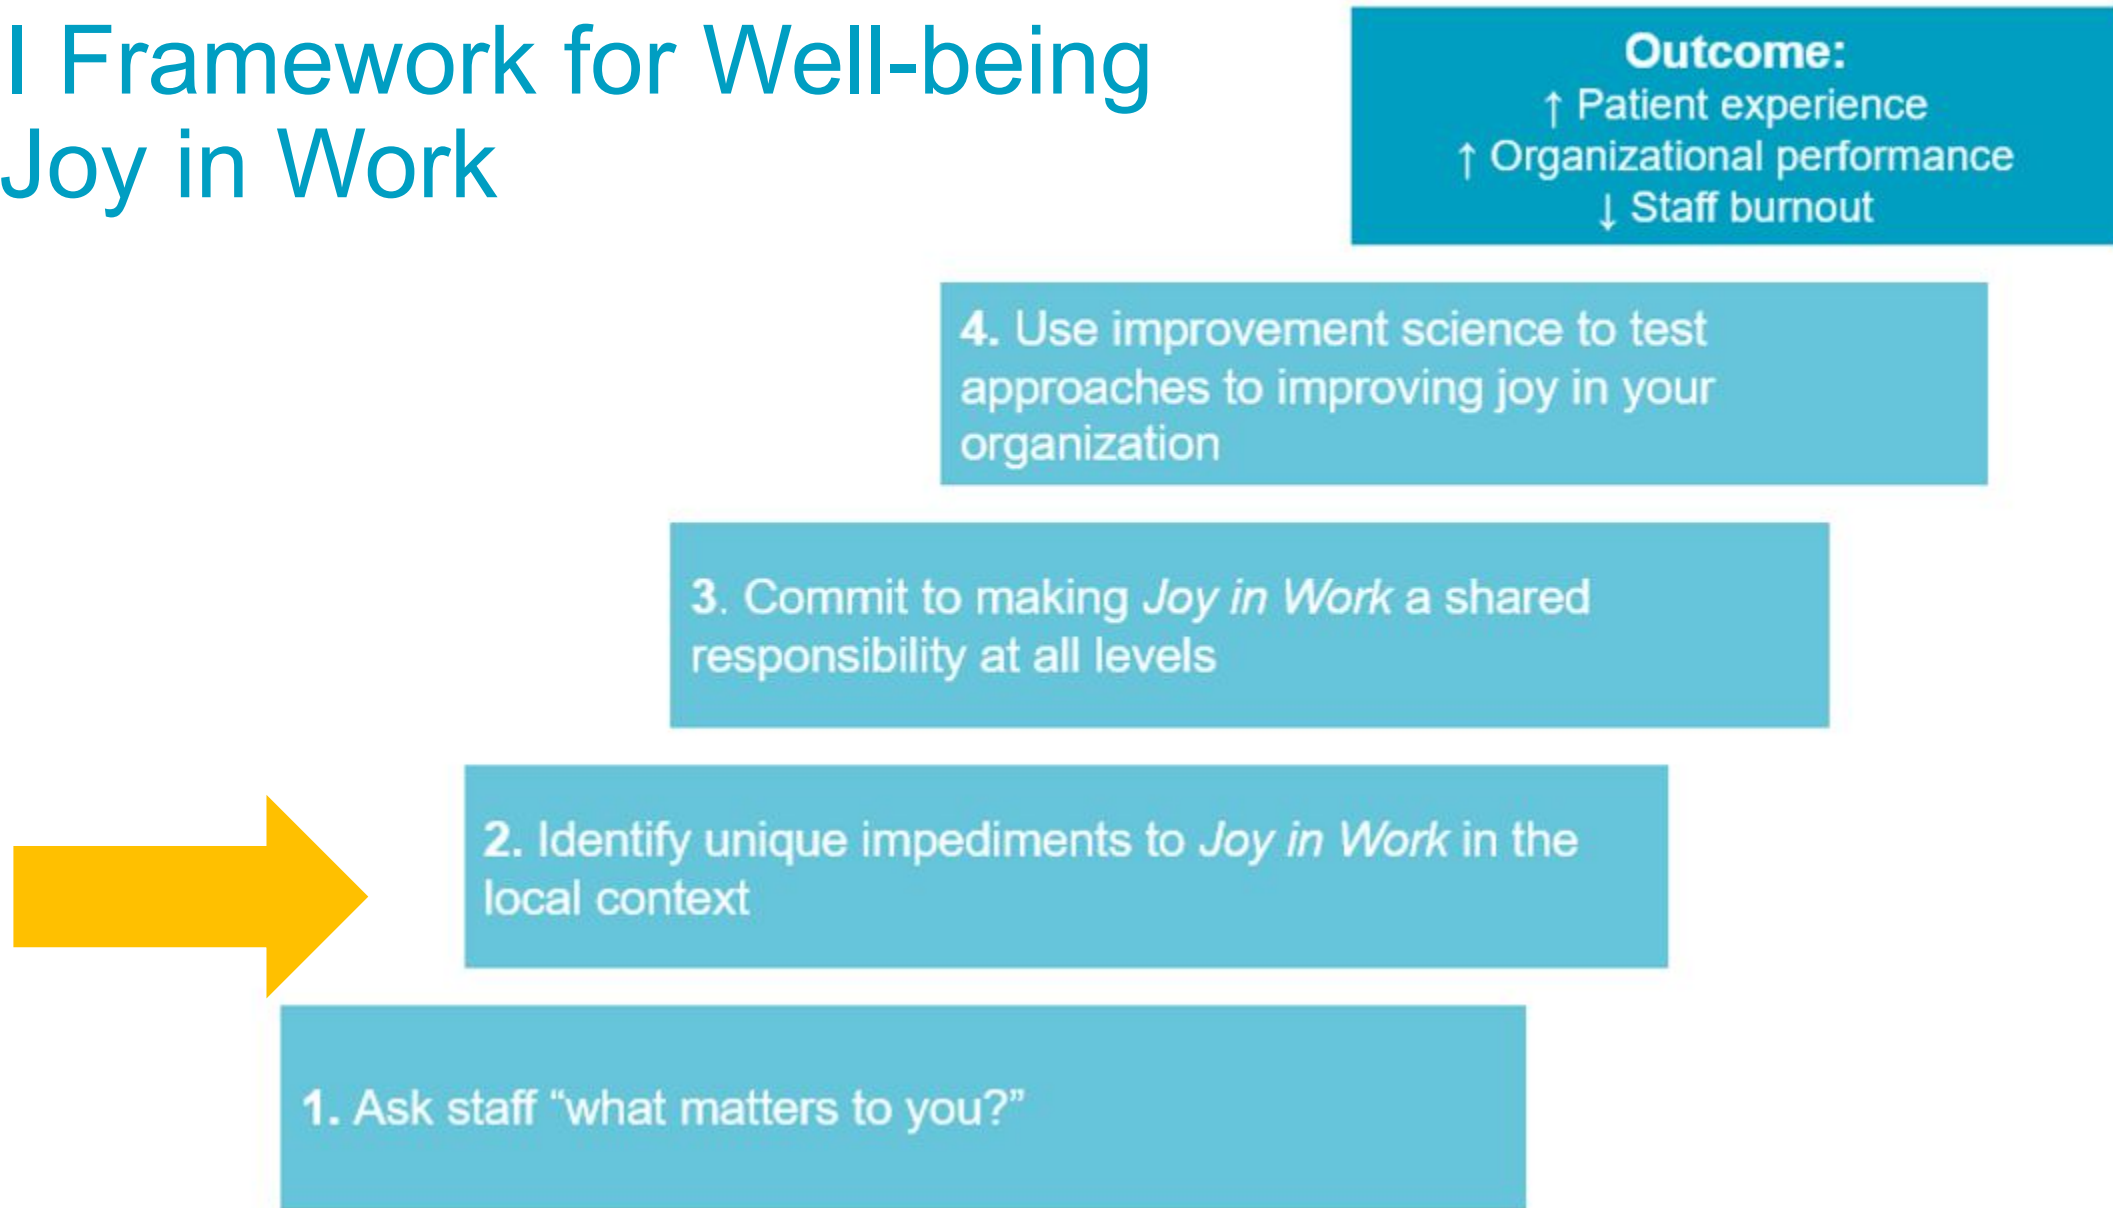

- Celebrates positives
- Provides energy for change

Ask one:

- What matters to me is . . .
- What makes me proud to work here is . . .
- The most meaningful or best part of my work is . . .
- I know I make a difference when . . .
- When we are at our best, here’s what it looks and feels like . . .
- What brought me to healthcare . . .
- What is going well with how our team has responded in the pandemic. . .

IHI Framework for Well-being & Joy in Work

-
- Ask team to share:
 - What gets in the way of “what matters”?
 - What gets in the way of a good day is . . .
 - What frustrates me in my day is . . .
 - What pebbles in your shoe get in the way of what matters?
 - Seek to understand – not immediately fix:
 - “Help me understand what that looks like?”
 - “What happened yesterday that would be an example of that?”
 - “What ideas do you have?”

-
- May come from frustration over the same repeated pebbles you're trying to remove
 - Can change to positive voices – when hope is restored
 - A few steps:
 - Acknowledge what you're hearing – “this issue frustrates you... did I get that right?”
 - Capture issues on stickies – make their pebbles visible
 - When the comment is ‘if they would just ...’ – you ask ‘what can we do now?’
 - When comments include “Always” or “Never”, ‘they never...’ – ask for specifics: ‘help me understand what that looks like’

Ways to Have the Conversation

- Test sharing with a colleague; get their reaction – clear, meaningful, helpful?
- Start by reflecting on your personal “why” which expresses your meaning & purpose in the work you do; authentic, from the heart
- Use huddles – 10-15 min; don’t wait for big meetings – it will take too long; start a huddle with yesterday’s bright spot or ‘moment of joy
- Try “What Matters to You Speed Dating” - 3 minute rounds; 1.5 minutes for each partner to share
- “RCT” – Random Coffee Trials – coffee gift cards and the only rule is it has to be with someone you don’t normally work
- Use Jamboard or other virtual white boards to facilitate large groups virtually

*Q: Would “What Matters to You?”
Conversations be helpful in
advancing your work? Why or why
not?*

IHI Framework for Well-being & Joy in Work

Learning from practical application in the UK

Mental health services
Newham, Tower Hamlets, City & Hackney, Luton & Bedfordshire

Forensic services
All above & Waltham Forest, Redbridge, Barking, Dagenham, Havering

Child & Adolescent services, including tier 4 inpatient service

Regional Mother & Baby unit

Community health services *Newham, Tower Hamlets & Bedfordshire*

IAPT
Newham, Tower Hamlets, Richmond and Luton

Five Primary care practices

Clinically led

Accessibility

People participation

Collective, inclusive leadership

Effective team working

Staff able to contribute towards improvements at work

Staff Motivation to Work

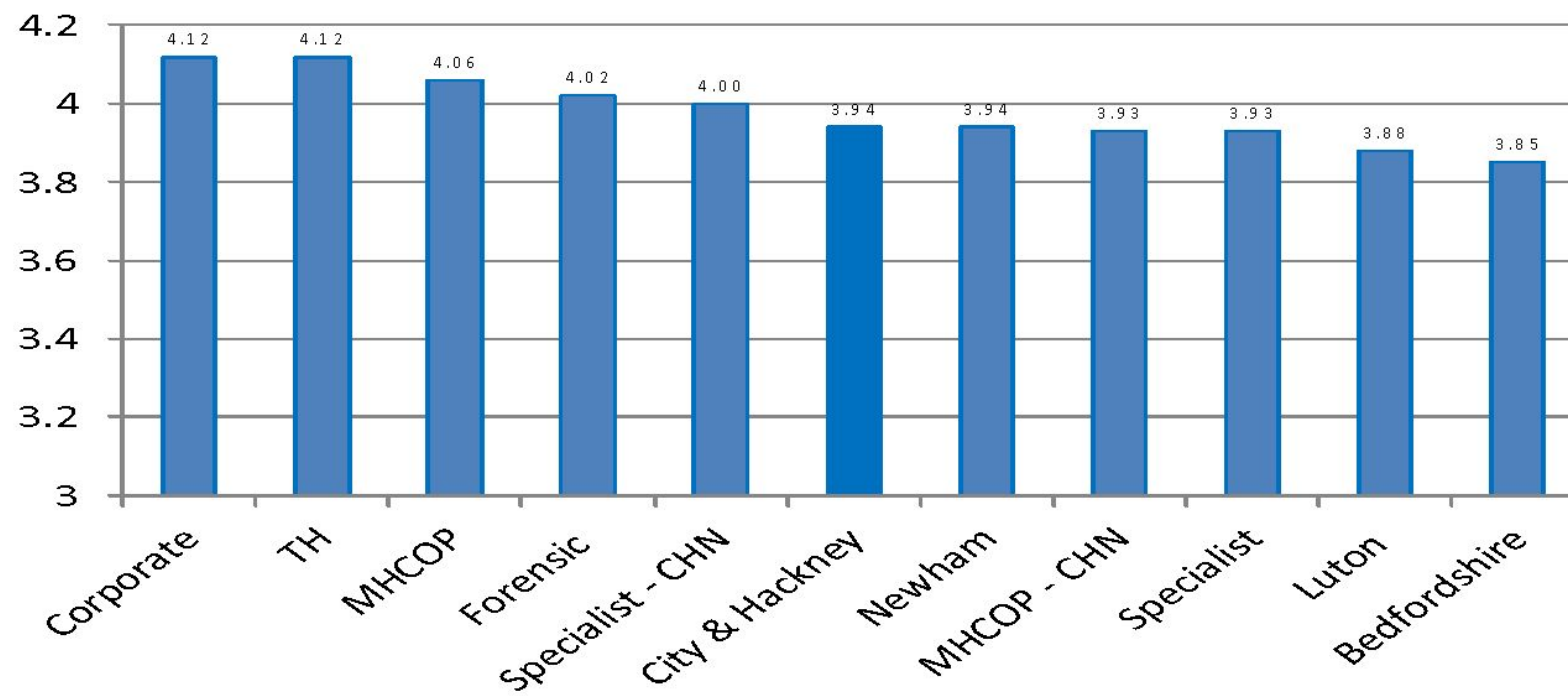

Staff job satisfaction

QI Team Joy in Work Project

QUESTIONS POLLS

Live poll 11

Tuesday 14th November

Did you enjoy your day today? (Tuesday 14th November)

☒ Mostly Yes

☐ Mostly No

Describe your reasoning in 5 words or less

Great time with data team

1. To what extent do you agree with the following statement? : "Did you have a good day at work yesterday?"

☐ Strongly disagree

☐ Disagree

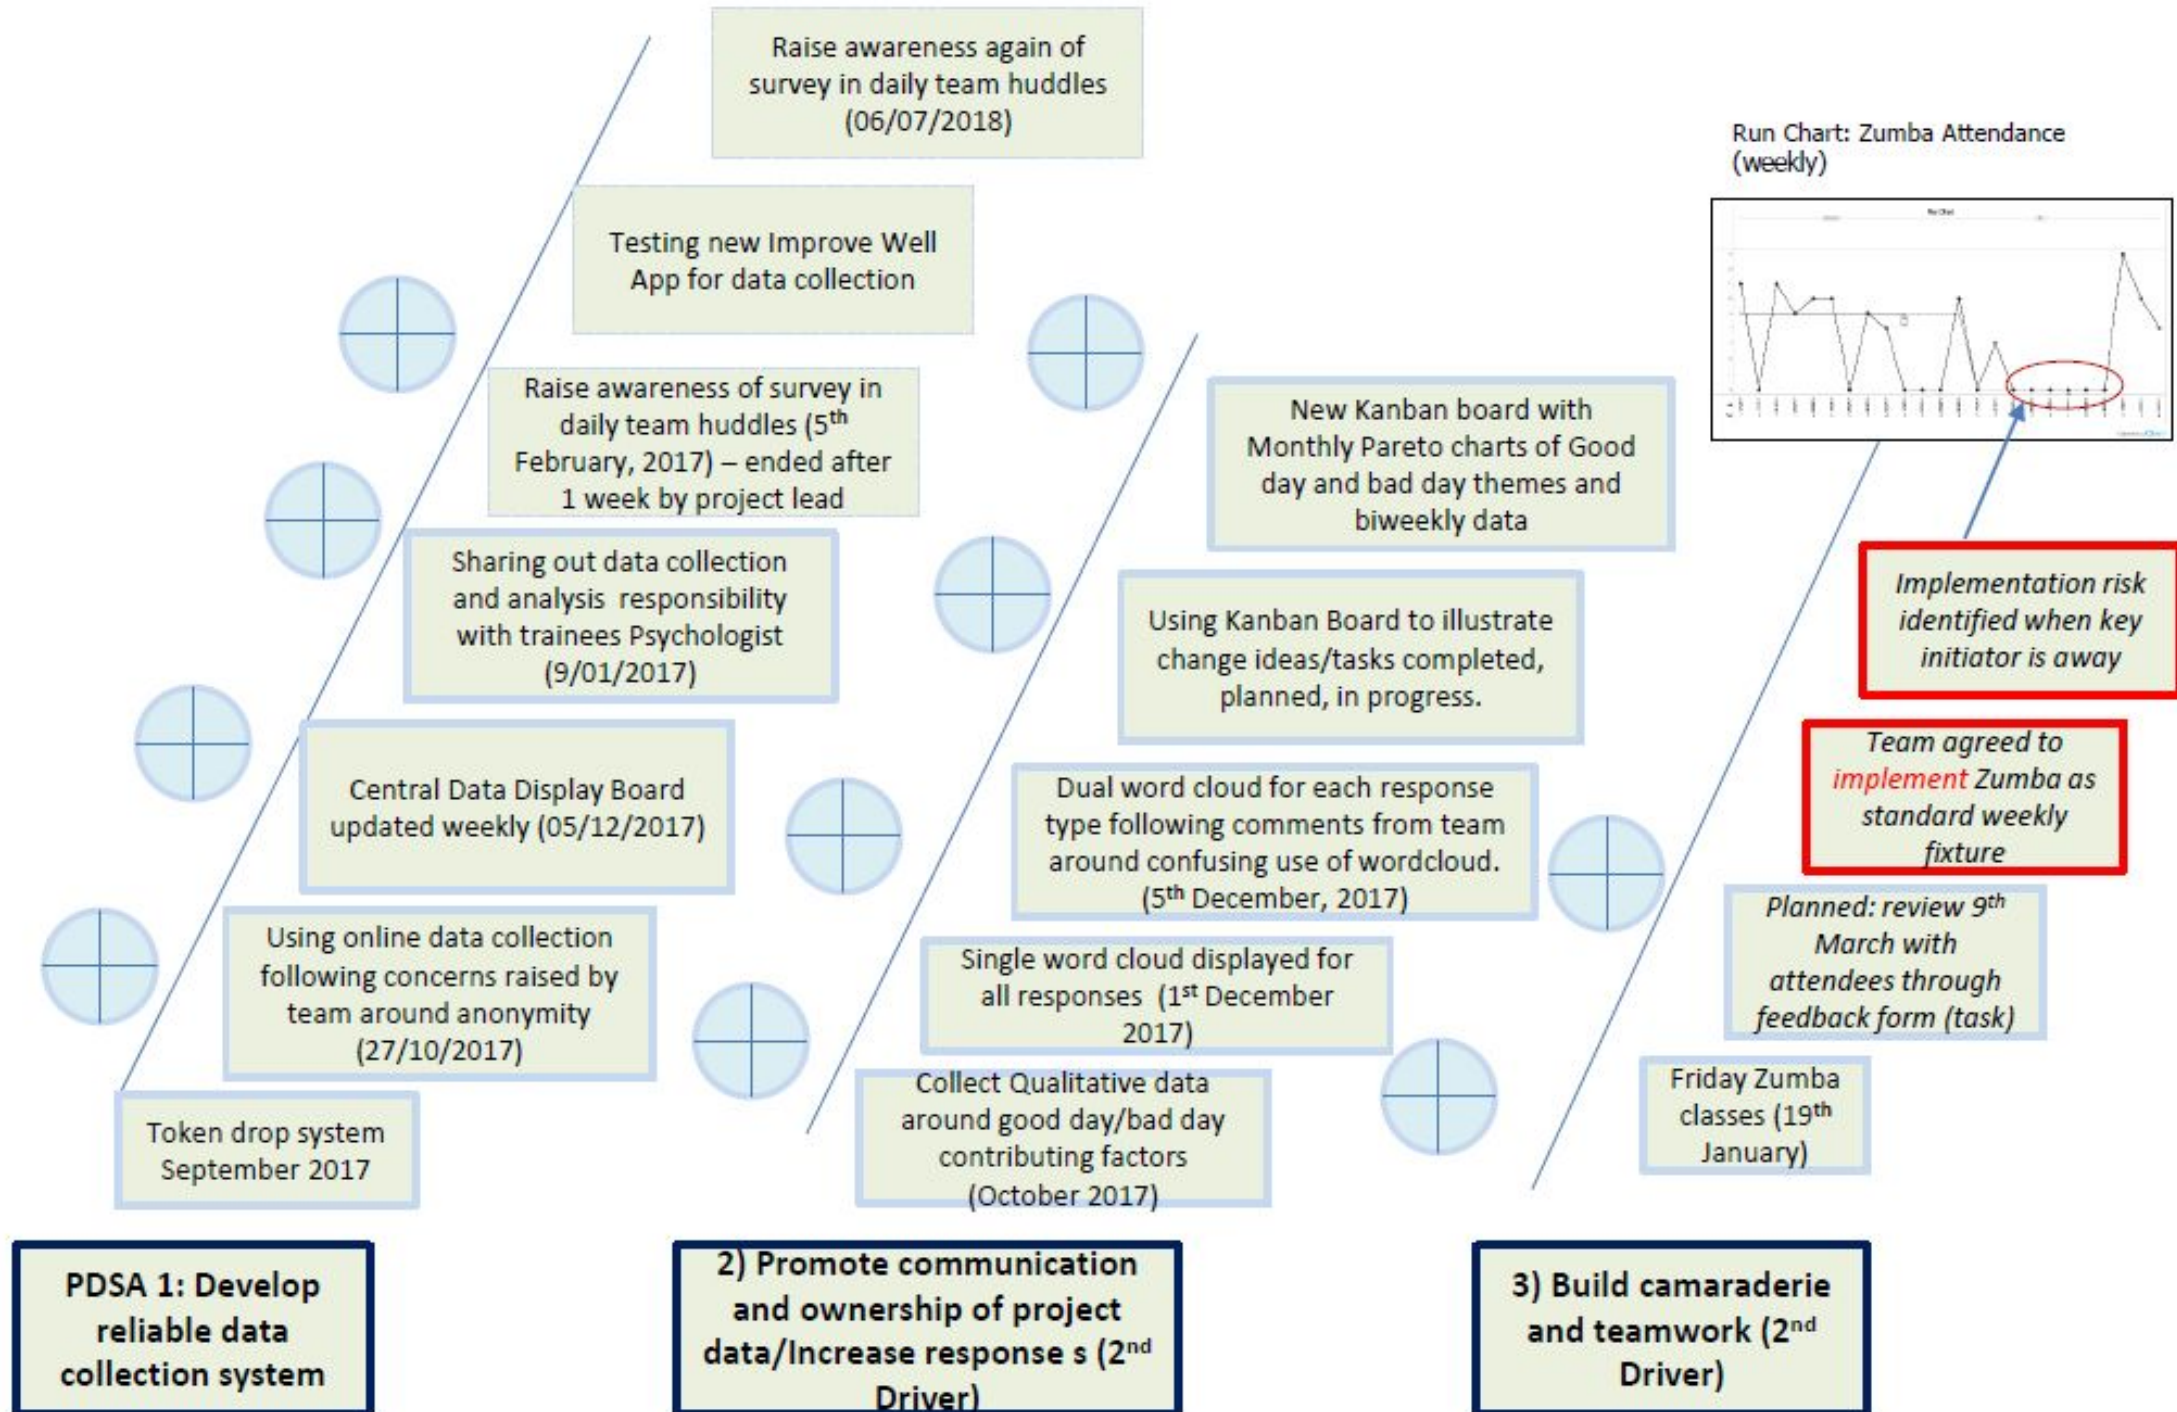

☐ Agree

☐ Strongly agree

2. Please provide a short explanation for why you have given this response

3. What suggestions do you have to improve your experience at work?

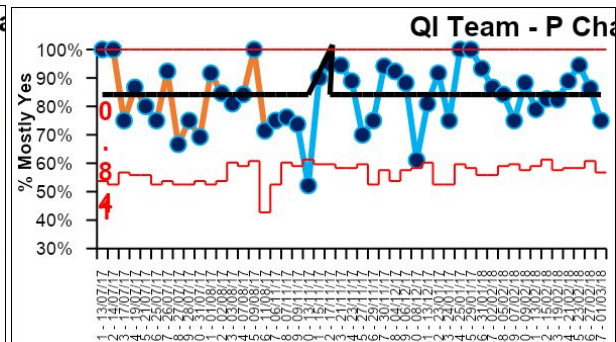

GOOD DAY MEASURE

EPCT South data until 20/11/17.
Team leaves collaborative in Feb 18

Luton IAPT data until 11/12/17.
Team leaves collaborative in Feb 18

Subgroup = a minimum of 12 responses is required for each subgroup.

Five cohorts at ELFT... 2017-21

75 teams in total

**Support from
improvement advisor,
sponsor &
organisational
development**

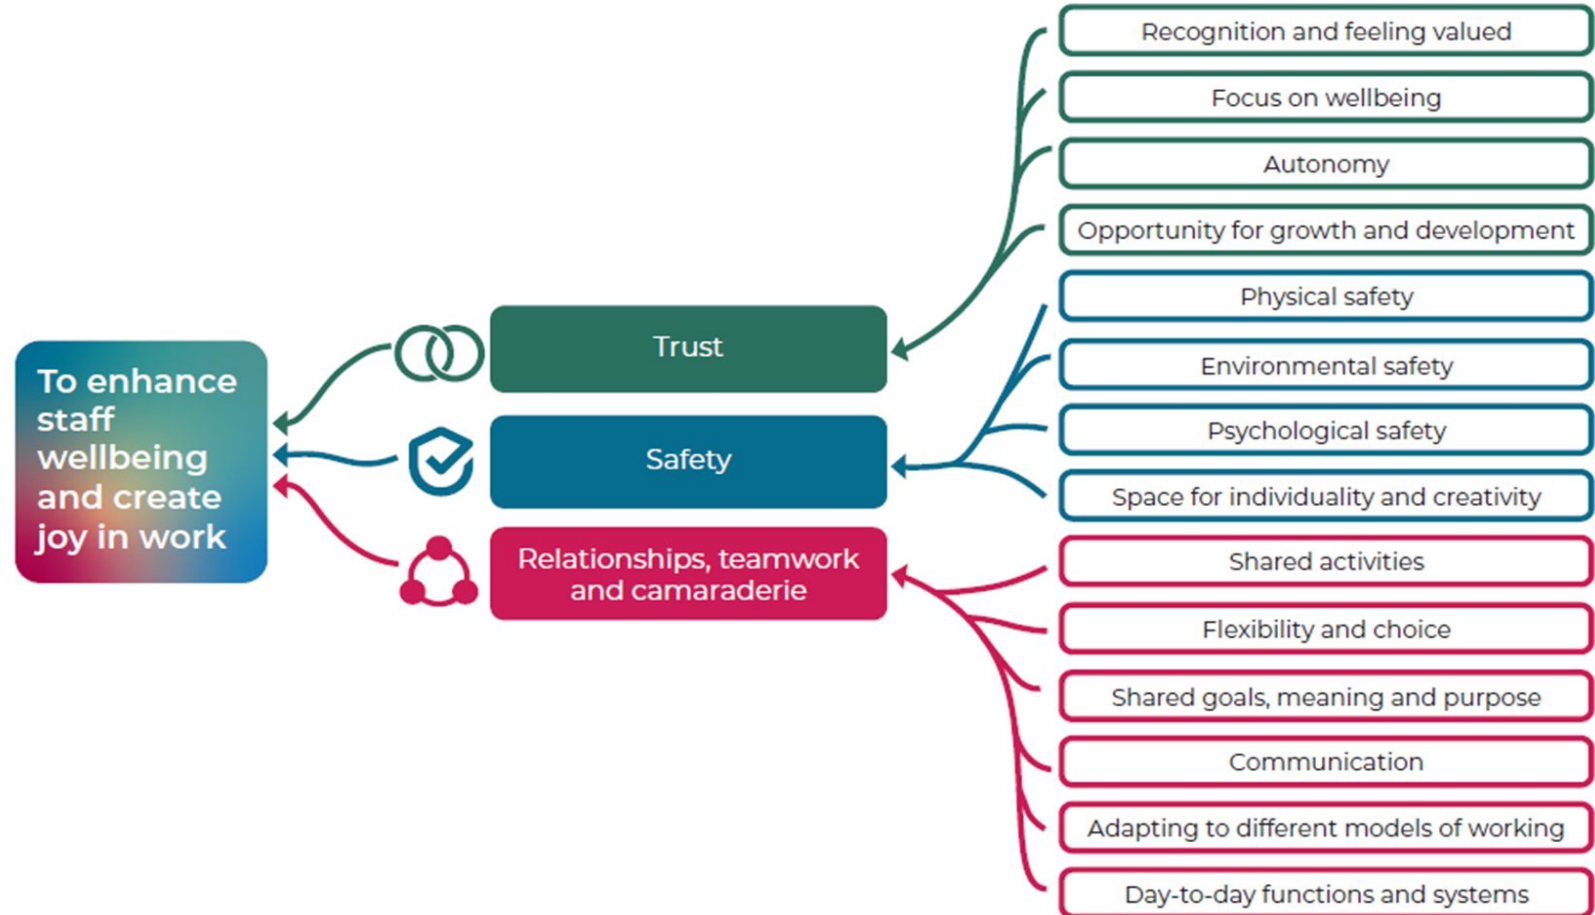

**Standardised the
measures & data
collection**

**Increased focus on
qualitative data and
stories**

**Created a learning
system around the
teams**

To enhance staff wellbeing and create joy in work

Model for Improvement

Enjoying work

% people who have enjoyed being at work frequently

Feelings of burnout

% people who experience no symptoms of burnout

Recommending team as a place to work

% people who are **extremely likely** to recommend their team as a place to work (9 or 10 out of 10)

Key learning...

It is possible to apply
the systematic method
of QI to joy in work

Key learning...

It is possible to apply
the systematic method
of QI to joy in work

Measurement is a
challenge

HOW DO WE KNOW
?

keep it simple.

Pick something meaningful

Measure it regularly

Share the data to spark conversation and curiosity

Take action – develop ideas, and test

We work well with other teams within the organisation

I am able to influence the way things are done in my team

In the last 7 days, I have received recognition or praise for my work

I am kept informed about what is going on in our team

I know exactly what is expected of me in my job

I have sufficient time to do my job well

The people I work with are friendly

I have the resources I need to do a good job

Key learning...

It is possible to apply the systematic method of QI to joy in work

Measurement is a challenge

Importance of the whole team being part of the work

Whole system

Organisation

Team

Individual

Key learning...

It is possible to apply the systematic method of QI to joy in work

Measurement is a challenge

Importance of the whole team being part of the work

Role of leaders is even more critical (and exposed)

The change ideas are highly localised, but the process is scalable

POSITIVE GOSSIP

Good Day Measure
% of staff reporting a good day

Key learning...

It is possible to apply the systematic method of QI to joy in work

Measurement is a challenge

Importance of the whole team being part of the work

Role of leaders is even more critical (and exposed)

The change ideas are highly localised, but the process is scalable

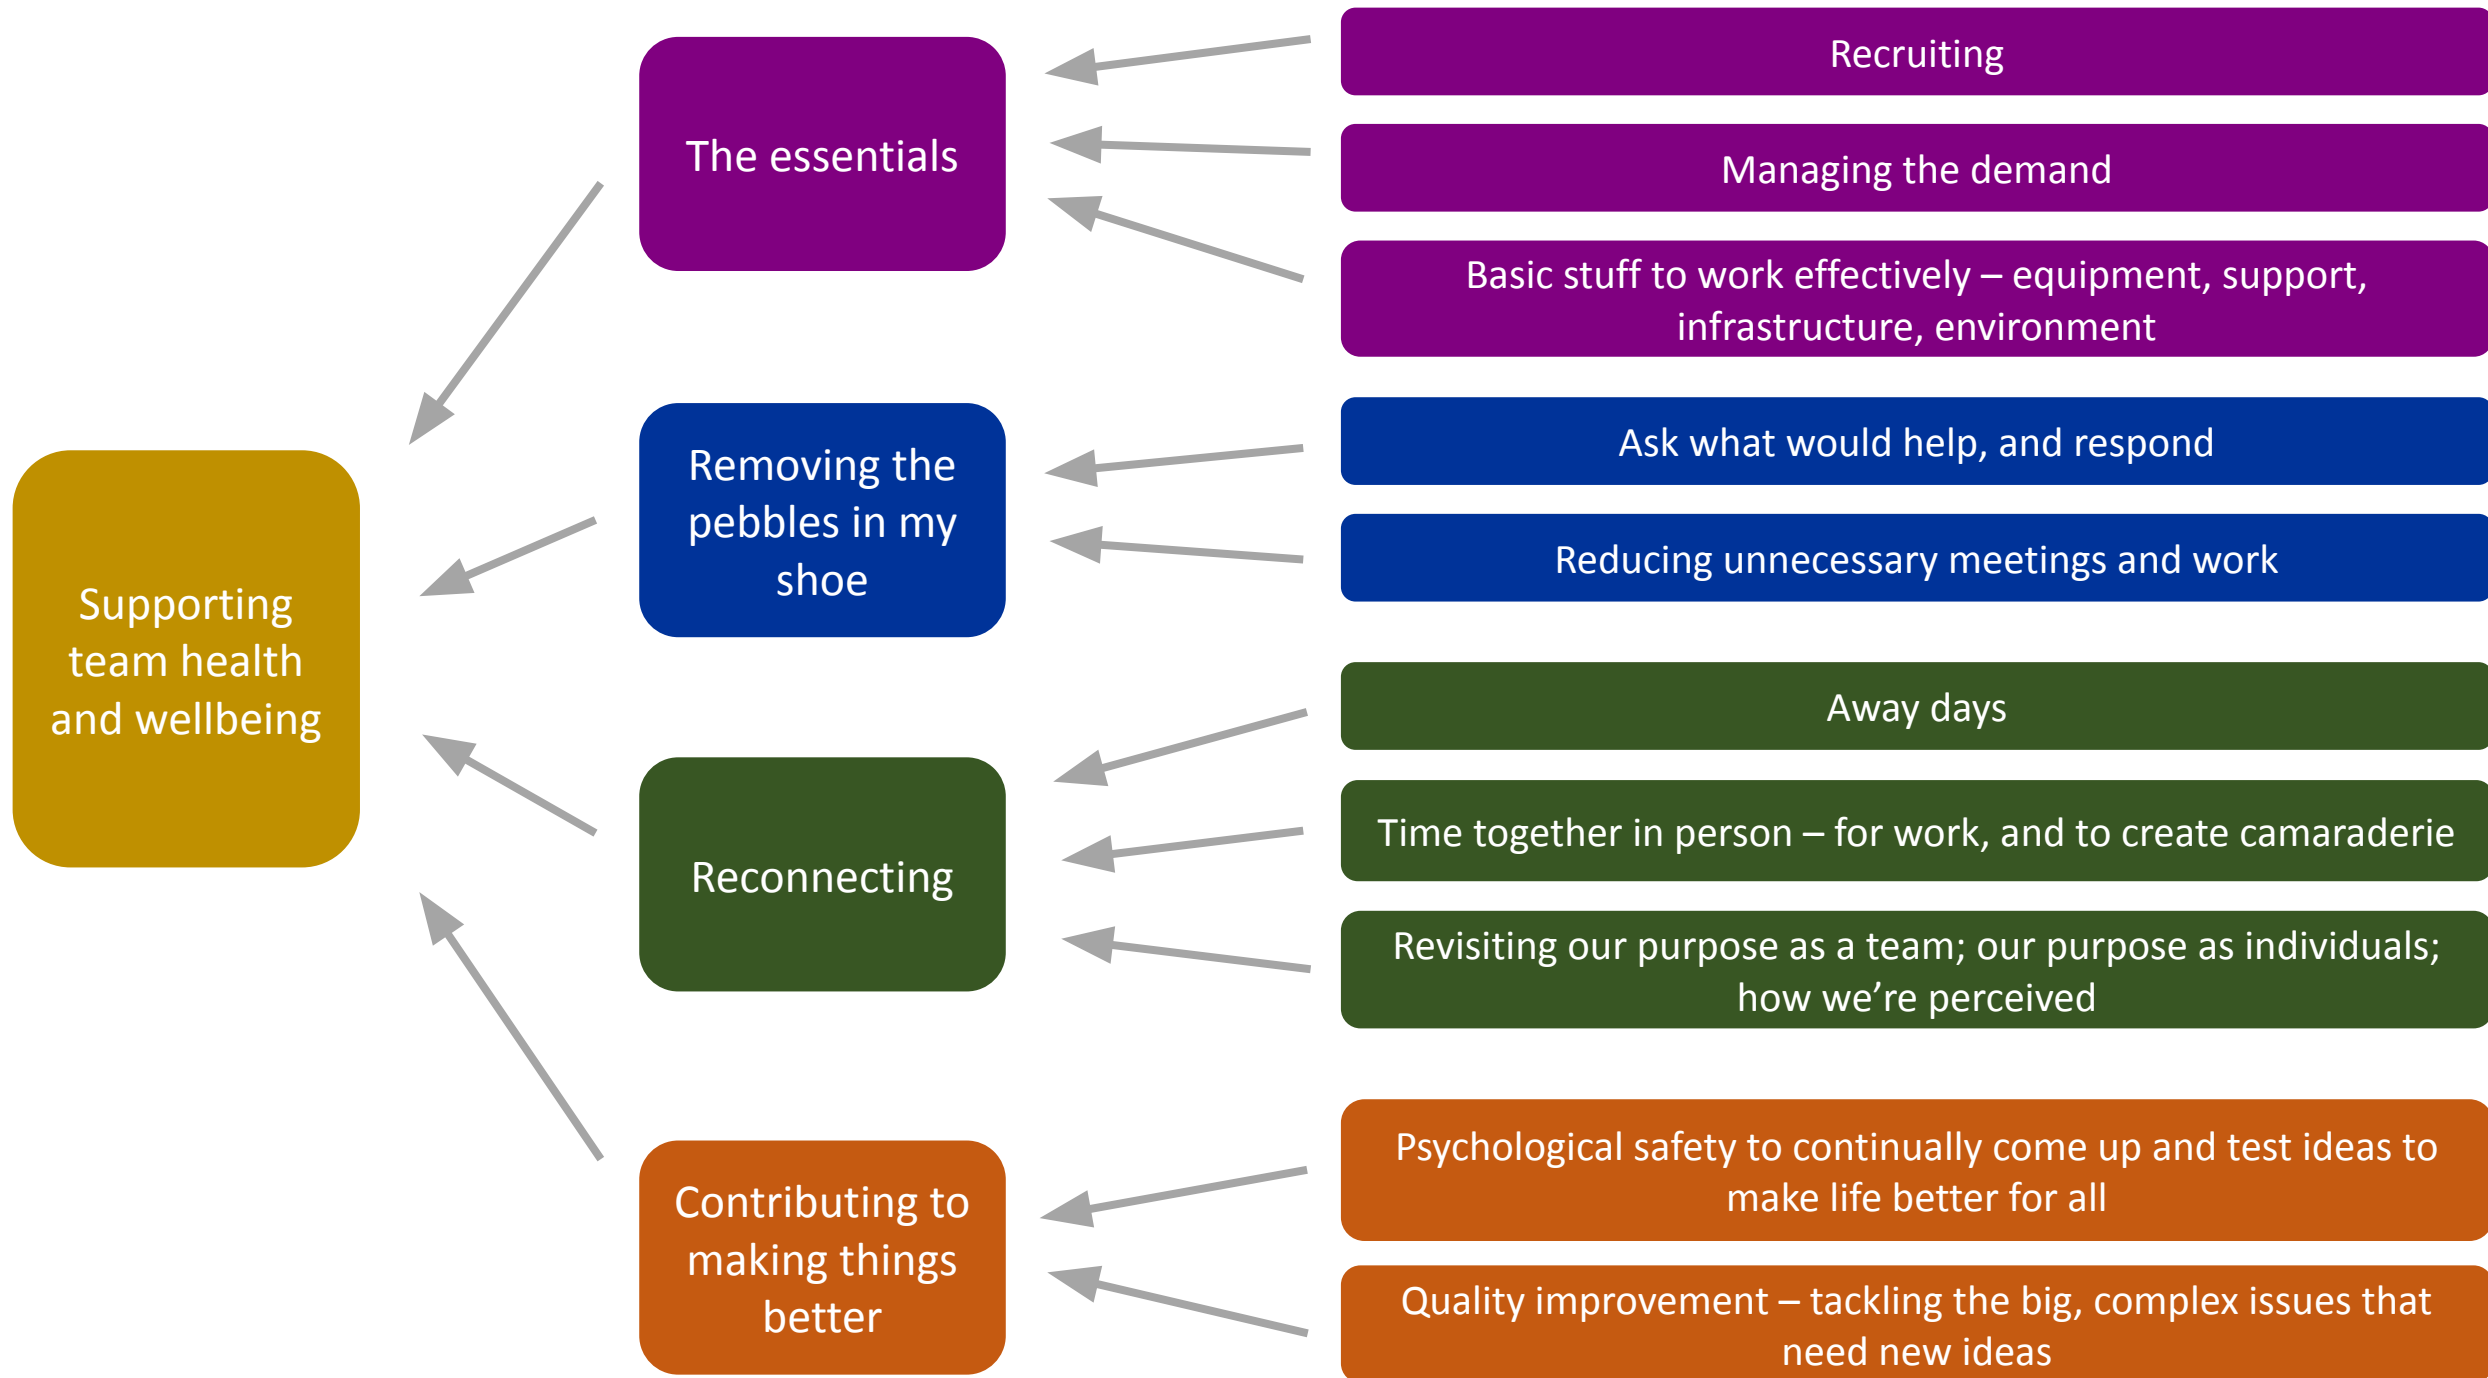

Supporting this type of work entirely virtually is less joyful

Where Are

We Now?

Q:What might you test to support well-being / joy in your work or learning environment?

Questions?

The gifts of hope, confidence, and
safety that health care should offer
patients and families

can only come from a workforce
that feels hopeful, confident, and
safe.

Joy in work is an essential resource
for the enterprise of healing.
